## ABOUT EXPOSTAR DISPLAYS

Hardly a trade show opens these days without evidence of the innovation and excellence of ExpoStar Displays somewhere on the show floor.

From the distinctive elegance of our trademarked arch-top folding displays to the compelling presence of our unique patented column design, ExpoStar's powerful portables provide display solutions to tradeshow challenges for clients large and small all across America.

When it comes to powerful portable displays that stop people in their tracks on the trade show floor, there's only one ExpoStar.

### Large Format Color Graphics

ExpoStar offers a full service graphics department with a staff of talented designers to help in all phases of planning and designing your display. Using state-of-the-art graphic computers and large format color printers we can work with existing artwork or create spectacular murals from your slides, prints or artwork.

### Shipping Information

Our production time is one of the fastest in the industry and your shipment is monitored every step of the way with our UPS Maxitrac ground computer terminal. Most display orders ship 10 working days from the receipt of order with a 50% deposit. For complex graphics please allow 3 weeks to avoid rushing the design process. Please figure shipping times when placing your order. Next day, 2nd day or 3rd day shipping is also available.

## EXPOSTAR MAKES ORDERING EASY

Whether you're an old hand at working with trade show displays, or this is the first time you've even thought about it, ExpoStar makes ordering easy.

Your time is valuable, so look over the material in this guide carefully. It will help you as we move through the selection and design process, helping you be better informed in every decision you make along the way.

This guide is designed to make the selection process simple by grouping the various styles of displays together. Custom configurations or variations of the standard designs are available which make your choices limitless.

Working with our Authorized Dealers ExpoStar maintains a network of authorized dealers all across the country. This gives you excellent, at-your-fingertips service as you select the ExpoStar display system that best meets your needs and design the graphics that will ultimately tell your story.

To locate the dealer nearest you, give us a call at 1-888-EXHIBIT.

All ExpoStar Displays are built by skilled craftsmen using only the finest display materials available. All materials and workmanship are guaranteed against defects for five years from the original date of purchase.

## PANEL SPECIFICATIONS

### HOW TO USE THIS GUIDE

Displays by ExpoStar offer you maximum flexibility. Each display in this guide features several versions of that system most often chosen by our customers. In most cases, that display or a slightly altered version of that system will fit your needs. However, because of the component-based concept of all ExpoStar displays, you have complete flexibility to create any kind, style or size of display you need. Just ask your authorized dealer to help you decide which ExpoStar solution best suits your tradeshow needs.

### ABOUT OUR GRAPHICS SERVICES

As well as specializing in top-quality display kits and accessories, ExpoStar offers a fully staffed design department to assist you with your graphic needs. We gladly provide quotes for graphic services and materials for your display.

Our design staff has a wide range of capabilities including:

- Assisting you in designing your display using your existing promotional materials.
- Creating high-end computer-generated graphics from photographs, illustrations and text, such as our large MegaMural Graphic designs. (pages 22 & 23)
- Creating header graphics and reproducing logos for corporate identity.
- Mounting and laminating photographs and artwork.
- Producing signage and text panels for your display panels in vinyl or large format color printers.

Give us a call for more information about our services. We will locate the dealer nearest you for convenient service. ExpoStar offers a turnkey approach to portable displays.

*The following size specifications define ExpoStar's basic and Arch-Top display panels (see next section— Displays). ExpoStar also provides customized components, like columns, curve panels, towers, bridges and counters. Combine these components with our basic panels to increase the visual impact of your display.*

### BASIC PANELS

ExpoStar's standard displays are based on a uniform size panel. Using these panels as building blocks, we can construct any configuration you need for your display.

**Single Panel**  
22" x 44", 4.5 lbs.

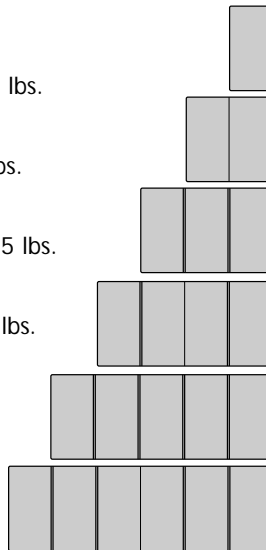

**Double Panel**  
44" x 44", 9 lbs.

**3-Panel**  
68" x 44", 13.5 lbs.

**4-Panel**  
90" x 44", 18 lbs.

**5-Panel**  
114" x 44"  
23 lbs.

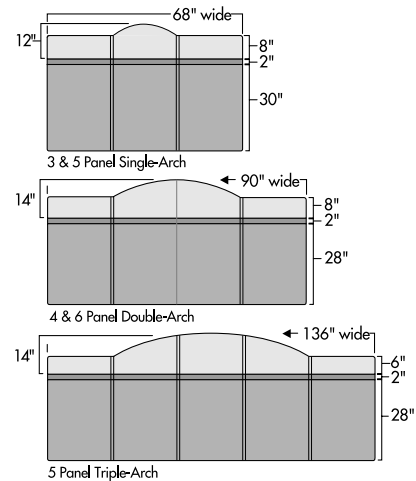

**6-Panel**  
136" x 44"  
27 lbs.

### ARCH-TOP PANELS

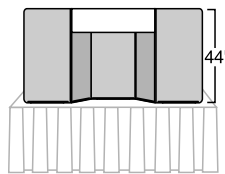

All standard Arch-Top displays have a 2" accent stripe and header stripe on front side, solid color on back. Stripes are optional on back.

The following chart is provided to assist in placement and location of graphics.

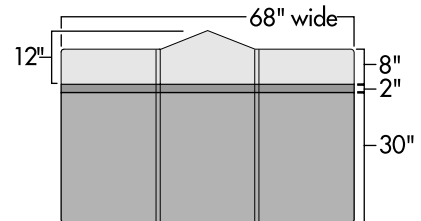

For example:

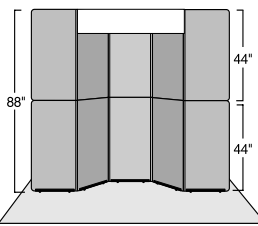

A 5-Panel Tabletop Display

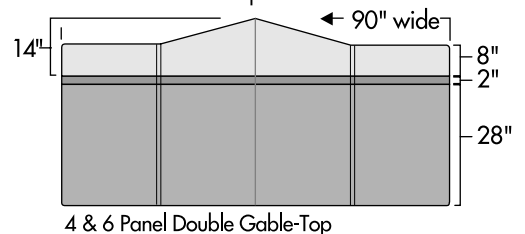

Single panel height 44"

A 10-Panel

Stacked panel height 88"

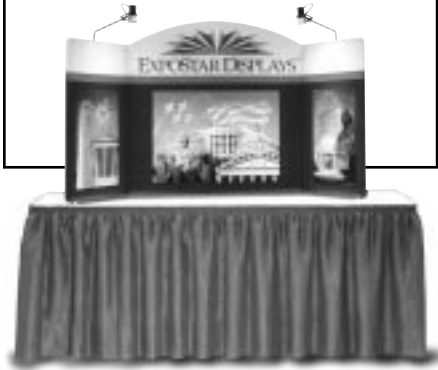

4 & 6 Panel Double Gable-Top

## CUSTOMIZED COMPONENTS

The following components coupled with our basic display panels maximize visual impact and create a more expansive custom look.

### TOWER & BRIDGE

**ETB-84BLH**

Backlit bridge header attaches to tower to create double-sided lighted header for corporate identity. Tower may also be used separately as two 46" podiums by adding curved podium tops. Includes two light bars. One carton, 55 lbs.  
**\$1295**

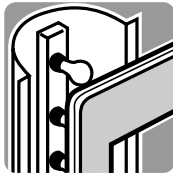

### SOFFIT PANELS

Translucent Lexan® soffit panels are available for all backlit headers. Simply unroll, attach to the header with magnets and to the display with Velcro® to provide a diffuser for the light bar.  
**\$1 per inch length of header**

### LIGHT BOXES

**CLB•16/30**

**Collapsible Light Box**  
 Includes framed cutout (18" x 30" max), 3-bulb light bar.  
**\$250**

### PANEL WINDOW

**PCO•16/30 Panel Window**

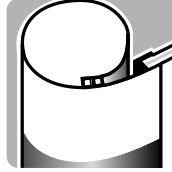

Panel openings can be custom cut for video monitors, recessed shelving, etc. or any specifications no larger than 18" x 30".  
**\$75**

### CURVE PANELS

Customize your display by adding ExpoStar's unique 360° curved end caps or columns. Simply roll and lock into place for each assembly. Order right and left pair for tabletop, and two pair (right and left) for freestanding displays. Patent pending.

## CUSTOM HEADERS

Display panels can be custom-cut to a variety of shapes and sizes to match your company logo or image. For custom-cut headers add \$75.

## ABOUT CUSTOM STRIPING

- Custom striping adds bold graphic lines or a subtle design element to your display.
- To calculate cost for adding stripes, simply count the number of fabric stripes (or seams) and the number of panels and/or curves to be striped. Use the chart below for assistance.
- For Curved Podium, Curved Desk or Curved Tower add \$25 per stripe per seam. For Monticello columns add \$25 per seam.

NUMBER OF SEAMS OR STRIPES

PANELS WITH STRIPES

	1	2	3	4	5	6	7	8
1	\$15	\$30	\$45	\$60	\$75	\$90	\$105	\$120

# TYPES OF GRAPHICS

## MEGAMURAL™ GRAPHICS

With this incredible computer process, any combination of photographs, backgrounds, logos and text can be combined, retouched, enhanced and printed in mural sizes. Transform your display walls into show stopping vistas with ExpoStar MegaMural graphics.

## PHOTO PANELS

Large photos make dynamic display signage. Photos can be reproduced directly from your transparencies or enhanced through color correction and retouching. Captions can be applied directly to photo or added with separate text strip signs.

## EXPOGRAPHICS

From charts and graphs to location maps, there is no limit to the informative and eye-catching original color graphics that ExpoStar can create. Let us design excitement and interest into your next presentation.

## HEADERS

The center or main sign on a display, often incorporating a company logo or name, is very important to your display's impact. A wide range of brilliant colors and backgrounds are available. Photos and other graphics can also be incorporated into the header.

## BACKLIT SIGNAGE

Most signage and photo panels can be prepared on translucent backgrounds for use with lightboxes. Backlit headers, available for many displays, add a bright new dimension to your message.

## TEXT STRIPS & PANELS

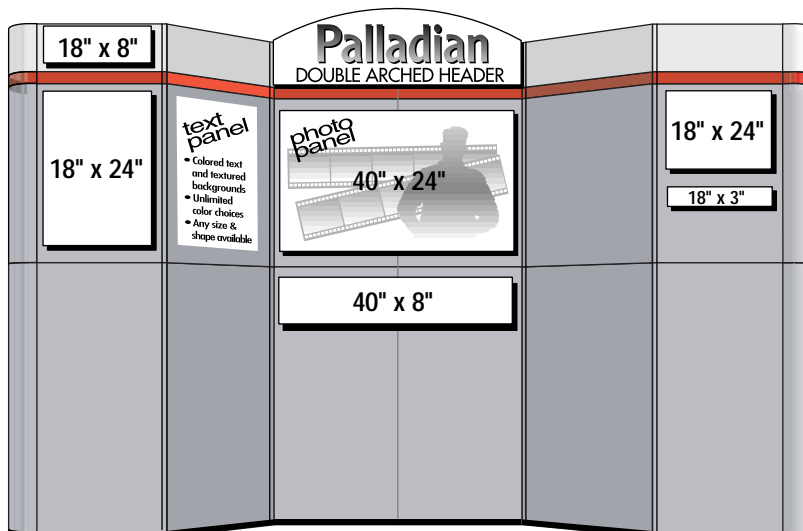

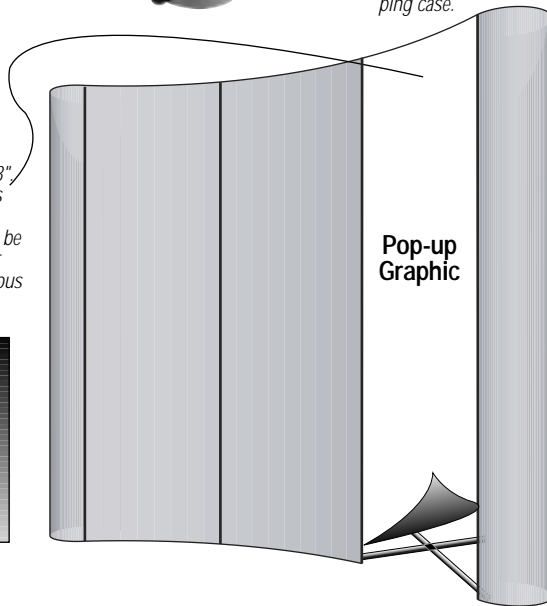

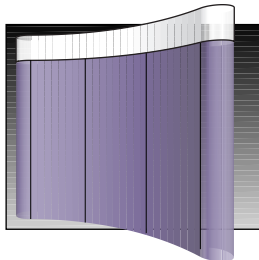

Signs with brief text can be created in a variety of ways- from single color text on clear plastic, to a rainbow assortment of colors and background textures.

## VINYL SIGNS

Durable, economical, vibrant. Vinyl signage adds an attractive accent to any graphics package.

## Pop-up Graphics

The Standard Size for each Starlite™ pop-up panel is 26.5" X 88". ExpoStar also produces graphics for all other sizes of Pop-up display units. Pop-up displays may be full graphic as shown at right, or with fabric panels and a continuous header as shown below.

Displays And Graphics

# GRAPHICS SPECIFICATIONS

## Media Accepted

(Macintosh Formatted Only)  
1.44 MB 3.5" Floppy Diskette  
100 MB Iomega Zip Disk  
1 Gigabyte Iomega Jaz Disk  
2 Gigabyte Iomega Jaz Disk  
CD Rom Disks, CD-RW (Rewritable)  
Any 3.5" Magneto Optical  
up to 640 MB

## Format Requirements

For output from your disk, supply native document at 100%, 50% or 25% of actual size in one of the following applications:

For StarFlex Digital Graphics:  
Adobe Illustrator (preferred)  
Quark XPress\*  
Macromedia Freehand\*  
Adobe Photoshop (photos)

For Vinyl Graphics  
Adobe Illustrator  
(vector art with fonts outlined)  
\*requires conversion at extra charge

Supply screen and printer fonts for each document and native versions of each file placed in the host document. Placed files must be EPS JPEG or TIFF Formats, RGB mode. Graphics files supplied in other applications may be converted or rebuilt at an extra charge. Please ask for a quote.

## Color Matching

The ExpoStar Graphics Studio is equipped with the latest technology in digital printers available in the graphics and display industry (see below). ExpoStar cannot guarantee exact color matching due to the nature of screen values that interpret color and other limitations inherent in this type of color printing equipment. We will do our best to match colors as specified, with the highest possible level of accuracy. For best results, specify color using the Tru-match color matching system. Re-printed Archived files will not exactly match original prints. Color prints that require exact color matching from one to the other must be batch printed.

## Resolution

All Photoshop or other bitmapped digital images must be supplied at a resolution of 75-100 dpi at the finish size of the graphic being produced.

## Resolution Formula

Choose smallest dimension of original image and smallest dimension of final size.

Final Size ÷ Original Size x 75 dpi = Minimum Resolution

Final Size ÷ Original Size x 100 dpi = Maximum Resolution

Example: Output final image at 44" x 55"

- 1) 4" x 5" original  $44" \div 4" = 11$        $11 \times 75 \text{ dpi} = 825 \text{ dpi} = \text{minimum}$
- 2) 2.5" x 3.5" original  $44" \div 2.5" = 18$        $18 \times 75 \text{ dpi} = 1350 \text{ dpi} = \text{minimum}$

Note: If the image is not to be used full frame, make sure that cropped dimension is used to determine resolution.

## Printers

36" LaserMaster DisplayMaker Inkjet  
50" Encad NovaJet Pro 50 Inkjet

## Scanners

Umax Mirage II 12" x 18" Flatbed Scanner
